

GENERAL ASSEMBLY

COMMONWEALTH OF KENTUCKY

2006 REGULAR SESSION

HOUSE BILL NO. 626

WEDNESDAY, MARCH 8, 2006

The following bill was reported to the Senate from the House and ordered to be printed.

RECEIVED AND FILED
DATE April 4, 2006
1:47pm

TREY GRAYSON
SECRETARY OF STATE
COMMONWEALTH OF KENTUCKY
BY R. Adles

AN ACT relating to the Public Service Commission.

Be it enacted by the General Assembly of the Commonwealth of Kentucky:

1 Section 1. KRS 278.020 is amended to read as follows:

- 2 (1) No person, partnership, public or private corporation, or combination thereof shall
3 commence providing utility service to or for the public or begin the construction of
4 any plant, equipment, property, or facility for furnishing to the public any of the
5 services enumerated in KRS 278.010, except retail electric suppliers for service
6 connections to electric-consuming facilities located within its certified territory and
7 ordinary extensions of existing systems in the usual course of business, until that
8 person has obtained from the Public Service Commission a certificate that public
9 convenience and necessity require the service or construction. Upon the filing of an
10 application for a certificate, and after any public hearing which the commission may
11 in its discretion conduct for all interested parties, the commission may issue or
12 refuse to issue the certificate, or issue it in part and refuse it in part, except that the
13 commission shall not refuse or modify an application submitted under KRS 278.023
14 without consent by the parties to the agreement. The commission, when considering
15 an application for a certificate to construct a base load electric generating facility,
16 may consider the policy of the General Assembly to foster and encourage use of
17 Kentucky coal by electric utilities serving the Commonwealth. *The commission,*
18 *when considering an application for a certificate to construct an electric*
19 *transmission line, may consider the interstate benefits expected to be achieved by*
20 *the proposed construction or modification of electric transmission facilities in the*
21 *Commonwealth.* Unless exercised within one (1) year from the grant thereof,
22 exclusive of any delay due to the order of any court or failure to obtain any
23 necessary grant or consent, the authority conferred by the issuance of the certificate
24 of convenience and necessity shall be void, but the beginning of any new
25 construction or facility in good faith within the time prescribed by the commission

1 and the prosecution thereof with reasonable diligence shall constitute an exercise of
2 authority under the certificate.

3 (2) For the purposes of this section, construction of any electric transmission line of one
4 hundred thirty-eight (138) kilovolts or more and of more than five thousand two
5 hundred eighty (5,280) feet in length shall not be considered an ordinary extension
6 of an existing system in the usual course of business and shall require a certificate
7 of public convenience and necessity. However, ordinary extensions of existing
8 systems in the usual course of business not requiring such a certificate shall include:

9 (a) The replacement or upgrading of any existing electric transmission line; or
10 (b) The relocation of any existing electric transmission line to accommodate
11 construction or expansion of a roadway or other transportation infrastructure;
12 or

13 (c) An electric transmission line that is constructed solely to serve a single
14 customer and that will pass over no property other than that owned by the
15 customer to be served.

16 (3) No utility shall exercise any right or privilege under any franchise or permit, after
17 the exercise of that right or privilege has been voluntarily suspended or
18 discontinued for more than one (1) year, without first obtaining from the
19 commission, in the manner provided in subsection (1) of this section, a certificate of
20 convenience and necessity authorizing the exercise of that right or privilege.

21 (4) No utility shall apply for or obtain any franchise, license, or permit from any city or
22 other governmental agency until it has obtained from the commission, in the manner
23 provided in subsection (1) of this section, a certificate of convenience and necessity
24 showing that there is a demand and need for the service sought to be rendered.

25 (5) No person shall acquire or transfer ownership of, or control, or the right to control,
26 any utility under the jurisdiction of the commission by sale of assets, transfer of
27 stock, or otherwise, or abandon the same, without prior approval by the

1 commission. The commission shall grant its approval if the person acquiring the
2 utility has the financial, technical, and managerial abilities to provide reasonable
3 service.

4 (6) No individual, group, syndicate, general or limited partnership, association,
5 corporation, joint stock company, trust, or other entity (an "acquirer"), whether or
6 not organized under the laws of this state, shall acquire control, either directly or
7 indirectly, of any utility furnishing utility service in this state, without having first
8 obtained the approval of the commission. Any acquisition of control without prior
9 authorization shall be void and of no effect. As used in this subsection, the term
10 "control" means the possession, directly or indirectly, of the power to direct or cause
11 the direction of the management and policies of a utility, whether through the
12 ownership of voting securities, by effecting a change in the composition of the
13 board of directors, by contract or otherwise. Control shall be presumed to exist if
14 any individual or entity, directly or indirectly, owns ten percent (10%) or more of
15 the voting securities of the utility. This presumption may be rebutted by a showing
16 that ownership does not in fact confer control. Application for any approval or
17 authorization shall be made to the commission in writing, verified by oath or
18 affirmation, and be in a form and contain the information as the commission
19 requires. The commission shall approve any proposed acquisition when it finds that
20 the same is to be made in accordance with law, for a proper purpose and is
21 consistent with the public interest. The commission may make investigation and
22 hold hearings in the matter as it deems necessary, and thereafter may grant any
23 application under this subsection in whole or in part and with modification and
24 upon terms and conditions as it deems necessary or appropriate. The commission
25 shall grant, modify, refuse, or prescribe appropriate terms and conditions with
26 respect to every such application within sixty (60) days after the filing of the
27 application therefor, unless it is necessary, for good cause shown, to continue the

1 application for up to sixty (60) additional days. The order continuing the application
2 shall state fully the facts that make continuance necessary. In the absence of that
3 action within that period of time, any proposed acquisition shall be deemed to be
4 approved.

5 (7) Subsection (6) of this section shall not apply to any acquisition of control of any:

6 (a) Utility which derives a greater percentage of its gross revenue from business
7 in another jurisdiction than from business in this state if the commission
8 determines that the other jurisdiction has statutes or rules which are applicable
9 and are being applied and which afford protection to ratepayers in this state
10 substantially equal to that afforded such ratepayers by subsection (6) of this
11 section;

12 (b) Utility by an acquirer who directly, or indirectly through one (1) or more
13 intermediaries, controls, or is controlled by, or is under common control with,
14 the utility, including any entity created at the direction of such utility for
15 purposes of corporate reorganization; or

16 (c) Utility pursuant to the terms of any indebtedness of the utility, provided the
17 issuance of indebtedness was approved by the commission.

18 (8) In a proceeding on an application filed pursuant to this section, any interested
19 person, including a person over whose property the proposed transmission line will
20 cross, may request intervention, and the commission shall, if requested, conduct a
21 public hearing in the county in which the transmission line is proposed to be
22 constructed, or, if the transmission line is proposed to be constructed in more than
23 one county, in one of those counties. The commission shall issue its decision no
24 later than ninety (90) days after the application is filed, unless the commission
25 extends this period, for good cause, to one hundred twenty (120) days. The
26 commission may utilize the provisions of KRS 278.255(3) if, in the exercise of its
27 discretion, it deems it necessary to hire a competent, qualified and independent firm

1 to assist it in reaching its decision. The issuance by the commission of a certificate
 2 that public convenience and necessity require the construction of an electric
 3 transmission line shall be deemed to be a determination by the commission that, as
 4 of the date of issuance, the construction of the line is a prudent investment.

- 5 (9) If any provision of this section or the application thereof to any person or
 6 circumstance is held invalid, the invalidity shall not affect other provisions or
 7 applications of this section which can be given effect without the invalid provision
 8 or application, and to that end the provisions are declared to be severable.

9 Section 2. KRS 278.714 is amended to read as follows:

- 10 (1) No person shall commence to construct a nonregulated electric transmission line
 11 without a construction certificate issued by the board. An application for a
 12 construction certificate shall be filed at the offices of the Public Service
 13 Commission along with an application fee as set forth in subsection (5) of this
 14 section.

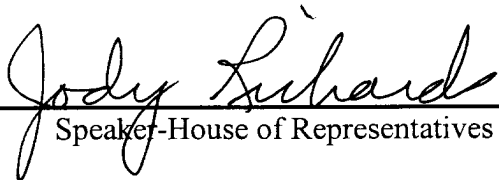

- 15 (2) A completed application shall include the following:

- 16 (a) The name, address, and telephone number of the person proposing
 17 construction of the nonregulated transmission line;
 18 (b) A full description of the proposed route of the transmission line and its
 19 appurtenances. The description shall include a map or maps showing:

- 20 1. The location of the proposed line and all proposed structures that will
 21 support it;
 22 2. The proposed right-of-way limits;
 23 3. Existing property lines and the names of persons who own the property
 24 over which the line will cross; and
 25 4. The distance of the proposed line from residential neighborhoods,
 26 schools, and public and private parks within one (1) mile of the
 27 proposed facilities;

- 1 (c) A full description of the proposed line and appurtenances, including the
 2 following:
- 3 1. Initial and design voltages and capacities;
 - 4 2. Length of line;
 - 5 3. Terminal points; and
 - 6 4. Substation connections;
- 7 (d) A statement that the proposed transmission line and appurtenances will be
 8 constructed and maintained in accordance with accepted engineering practices
 9 and the National Electric Safety Code;
- 10 (e) Evidence that public notice has been given by publication in a newspaper of
 11 general circulation in the general area concerned. Public notice shall include
 12 the location of the proposed line, shall state that the proposed line is subject to
 13 approval by the board, and shall provide the telephone number and address of
 14 the Public Service Commission; and
- 15 (f) Proof of service of a copy of the application upon the chief executive officer
 16 of each county and municipal corporation in which the proposed line is to be
 17 located, and upon the chief officer of each public agency charged with the
 18 duty of planning land use in the general area in which the line is proposed to
 19 be located.
- 20 (3) Within ninety (90) days of receipt of the application, or one hundred twenty (120)
 21 days if a local public hearing is held, the board shall, by majority vote, grant or deny
 22 the construction certificate either in whole or in part. Action to grant the certificate
 23 shall be based on the board's determination that the proposed route of the line will
 24 minimize significant adverse impact on the scenic assets of Kentucky and that the
 25 applicant will construct and maintain the line according to all applicable legal
 26 requirements. *In addition, the board may consider the interstate benefits expected*
 27 *to be achieved by the proposed construction or modification of electric*

- 1 *transmission facilities in the Commonwealth.* If the board determines that locating
2 the transmission line will result in significant degradation of scenic factors or if the
3 board determines that the construction and maintenance of the line will be in
4 violation of applicable legal requirements, the board may deny the application or
5 condition the application's approval upon relocation of the route of the line, or
6 changes in design or configuration of the line.
- 7 (4) A public hearing on an application to construct a nonregulated electric transmission
8 line may be held in accordance with the provisions of KRS 278.712.
- 9 (5) The board shall promulgate administrative regulations to establish an application
10 fee for a construction certificate for a nonregulated transmission line in accordance
11 with KRS 278.706(3).
